authorized to adjust settings

English

Turn ON the device

Press on

Turn OFF the device

Press and hold **+ VALIDATE**

Manage the ventilation

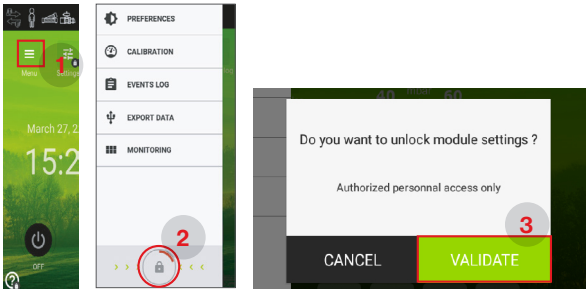

To start ventilation: press on
**To stop ventilation:** press and hold **+ VALIDATE.**
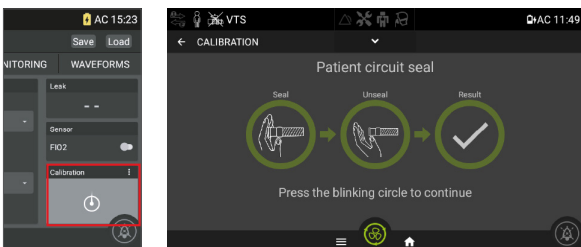

Unlock the Clinical Menu

Press on the **Menu** button **(1)**, then **unlock Clinical Menu pressing and holding (2)** and **VALIDATE (3)**.

Setup a New Patient or Circuit Type

Select **CLINICAL**, then **CONFIG** and set the configuration of Patient Circuit Type and the Ventilation Mode.
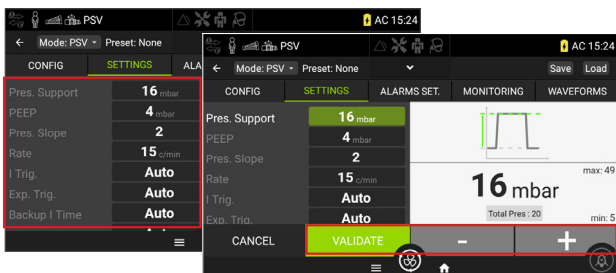

Perform Calibration / Autotest

Follow the steps displayed on the screen in order to perform a calibration, then press on **Result.**

The calibration shall be done after every circuit configuration change.
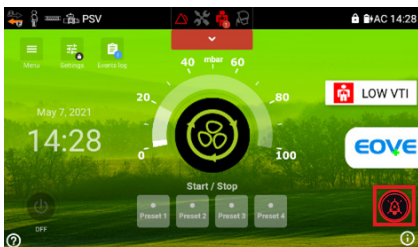

Setup the Ventilation Parameters

From the tab **SETTINGS**: choose the **ventilation settings**. Select the parameter to be set, adjust with **+** or **-**, then press on **VALIDATE** in order to validate the setting.

Setup the Alarms

From the tab **ALARMS SET.**, set the alarms, then press on **VALIDATE**.

Silence the Alarms

Inhibition of the active alarm: press on
Preventive inhibition (2 min)**:** press and hold + **VALIDATE**

Circuit configurations

Note: The EO-150 allows the use of every circuit that successfully completed calibration.

Single limb circuit with leak or mouth piece

Single limb circuit with expiratory valve (without proximal flow sensor)

**Single limb circuit with expiratory valve** (with proximal flow sensor)

Double limb circuit (with adapter)

The double limb adapter is single-patient use. In case of use on several patients, please use an antibacterial filter on the expiratory limb in order to protect the adapter.
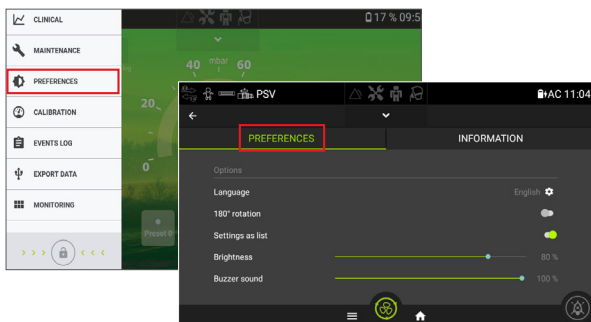

Disable Auto Lock of the Clinical Menu

The automatic lock of the Clinical menu (patient mode activation after 15 minutes of inactivity) can be deactivated from the **Maintenance** menu of the device, with the access code **"1586"**.

Configure the settings and alarms view

To configure the settings and alarms in list format (settings + monitoring on the same page), access the Preferences menu and activate "Settings in list format".
